

**Amendments to the Claims**

1. (CURRENTLY AMENDED) A display device comprising an array ~~(40)~~ of pixels arranged in pixel rows ~~(42)~~ and pixel columns ~~(44)~~ and a grid of first addressing conductors ~~(50)~~ and second addressing conductors ~~(52)~~, each individual pixel ~~(41)~~ in the array being associated with an intersection of a respective pair of the first and second addressing conductors ~~(50,52)~~ and thereby being uniquely addressable by the pair of addressing conductors, wherein the first and second addressing conductors ~~(50,52)~~ are not parallel with the pixel rows or pixel columns.
2. (CURRENTLY AMENDED) A device as claimed in claim 1, wherein the array of pixels comprises a regular array of identically-sized pixels ~~(41)~~.
3. (CURRENTLY AMENDED) A device as claimed in ~~claim 1~~ or claim 1, wherein the first and second addressing conductors ~~(50,52)~~ are straight.
4. (CURRENTLY AMENDED) A device as claimed in claim 3, wherein the first addressing conductors ~~(50)~~ are parallel to each other and the second addressing conductors ~~(52)~~ are parallel to each other.
5. (CURRENTLY AMENDED) A device as claimed in claim 3, wherein either or both of the first and second addressing conductors ~~(50,52)~~ are not all parallel to each other.
6. (CURRENTLY AMENDED) A device as claimed in claim 3, wherein the first and second addressing conductors ~~(50,52)~~ are non-orthogonal.
7. (CURRENTLY AMENDED) A device as claimed in ~~claim 1~~ or claim 1, wherein either or both of the first and second addressing conductors are curved.
8. (CURRENTLY AMENDED) A device as claimed in any preceding claim comprising a reflective or emissive display.

9. (CURRENTLY AMENDED) A device as claimed in ~~any~~ preceding  
~~claim~~claim 1 comprising an active matrix display device.
